Call for Exploratory Research Projects

- 12 month projects in ICT fostered by Portuguese Institutions
- Up to 8 projects will be selected

Open from:

May 19th to June 30th
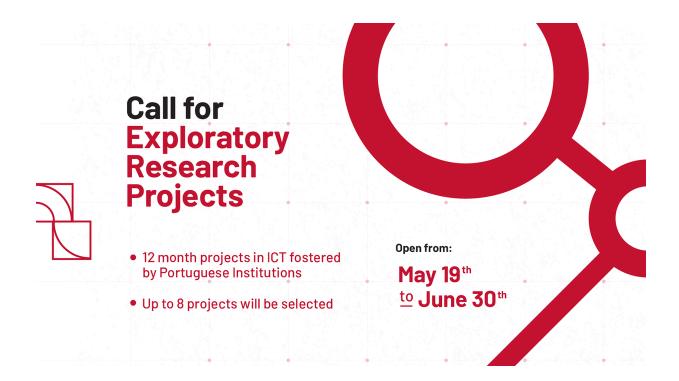

Open Call until June 30th for Exploratory Research Projects (ERPs) in strategic emerging areas of ICT under the scope of the CMU Portugal Program and funded through Fundação para a Ciência e a Tecnologia (FCT). The total investment available for Portuguese research institutions is up to €400 thousand euros. The research team at Carnegie Mellon University will be funded independently by the CMU Portugal Program at Carnegie Mellon University at a level similar to the Portuguese team.

September > December 2021
CMU Portugal 2021 Doctoral Symposium

CMU Portugal 2021 Doctoral Symposium

The CMU Portugal Program will host **between September and December, a Doctoral Symposium** addressed to all CMU Portugal Dual-Degree and Affiliated Ph.D. Program candidates, and all Ph.D. candidates conducting their doctoral thesis under a CMU Portugal research project. The main goal of this initiative is to foster a supportive community of Ph.D. candidates and a collaborative research environment by providing participants the

opportunity to present their work plans and discuss the results with their peers.

User Experience Design Talks @CMUPortugal

The Carnegie Mellon Portugal Program hosted between April and June a series of three webinars entitled **"User Experience Design Talks @CMU Portugal"** organized in the framework of the Advanced Training Programs in User Experience Design, planned to start in 2021.

Session 1: John Zimmerman (CMU HCI Institute)
Session 2: Lining Yao (CMU HCI Institute and Morphing Matter Lab)
Session 3: Gierad Laput (Research and Engineering Manager at Apple)

Innovative Ink that Allows to Print Flexible, Stretchable and Multi-Layer Circuits was the cover of the ACS Applied Materials and Interfaces Journal

A recent article from the "Soft and Printed Microelectronic" Laboratory (SPM-UC) at Universidade de Coimbra, led by Mahmoud Tavakoli – CMU Portugal Faculty member and WOW PI – was selected as the Cover Page of the ACS Applied Materials and Interfaces Journal. This research work introduces a unique printable ink that allowed, for the first time, digital printing of multi-layer stretchable circuits, e-skins and adhesive medical patches for electrophysiological monitoring. The ink formulation is patented jointly by the University of Coimbra and Carnegie Mellon University.
