

News from the Fence

Save the Date: "NEW FRONTIERS IN TECH" | 9-10 November, Lisbon
#CMUPT2022

The date for the **CMU Portugal Summit 2022, NEW FRONTIERS IN TECH**, is fast approaching. On November 9-10th, we will bring experts from Portuguese Universities, Carnegie Mellon University, and Companies to present ICT research progress in areas as diverse as Health, Forests, Security, Artificial Intelligence, Language Technologies, Machine learning, among others.

All students affiliated with CMU Portugal Ph.D. Programs, Visiting Students and Students within CMU Portugal research projects are invited to showcase their research at the Summit's poster sessions.

We count on your presence to join the discussion and explore the New Frontiers in Tech.

CMU Portugal selects eight students for a research period at CMU

A group of eight talented master's students and recent master's graduates from Portuguese Institutions has been selected to develop their research work in the Information and Communication Technologies (ICT) field at Carnegie

Mellon University (CMU). The researchers will visit CMU between October and December 2022, financed under CMU Portugal's "Visiting Students Program", an initiative supported by CMU Portugal and Fundação para a Ciência e a Tecnologia (FCT).

VISITING STUDENTS PROGRAM 2022

João Pinho
Researcher at INESC ID
Host Institute at CMU
LTI Institute

Marcelo Jacinto
Researcher at ISR/Técnico
Host Institute at CMU
Robotics Institute

Alexandra Gonçalves
MSc student at Técnico
Host Institute at CMU
HCI Institute

Pedro Madeira
Scientist at Fraunhofer Portugal
Host Department at CMU
Electrical and Computer Engineering

José Gomes
Research engineer at ISR/Técnico
Host Institute at CMU
Robotics Institute

Sofia Pereira
Ph.D. candidate at FEUP/INESC TEC
Host Department at CMU
Electrical and Computer Engineering

Diogo Soares
MSc student at Técnico
Host Institute at CMU
Institute for Software Research

Marta Freitas
Researcher at ISR/Coimbra
Host Department at CMU
Mechanical Engineering

ANI and CMU Portugal hosted a Session on Horizon Europe R&D Funding Opportunities

On September 23rd the Portuguese Agency for Innovation (ANI) in collaboration with the CMU Portugal Program, hosted the online Info session "Horizon Europe – Funding Opportunities for R&D and Innovation". The session counted with more than 100

participants, ranging from Academia to Industry interested in knowing more about the Horizon 2020 available initiatives.

CMU Portugal in the Media: New techniques to reduce e-waste under project WoW

E-waste is one of the fastest growing toxic waste in recent years. Rapid increase in the production of electronics and batteries is draining scarce metals and other mineral resources. Now, researchers from the

University of Coimbra (UC) have developed and tested a novel architecture of materials and fabrication techniques that allow us to reverse this reality and apply a new version of 3Rs policy (reduce, reuse and recycle) in the electronics area. The results were published in the journal *Advanced Materials*.

CMU Portugal Inside Story: John Mendonça

John Mendonça was one of the twelve Ph.D. candidates selected under the first edition of the Affiliated Ph.D. Programs. The Portuguese student received his MSc in Electrical and Computer Engineering from Técnico in 2020. During his master's he worked with DefinedCrowd, developing methods to detect crowdsourcing fraud. Under his Ph.D. in Language Technologies at Técnico, he is working in the MAIA research project at INESC-ID promoted by the ICT Company Unbabel.

New European Bauhaus (NEB): Portugal leads one of the six lighthouse projects

Bauhaus of the Sea Sails is one of the projects selected under the call for the development of 'lighthouse demonstrators' of the New European Bauhaus (NEB).

The project, that counts on CMU Portugal's institutional support, was awarded approximately €5 million by the European Commission. Scientists, Artists, Architects and Local Communities will work together to pursue the broad Vision of the New Bauhaus of the Seas, an initiative led by CMU Portugal National Codirector Nuno Nunes.

CMU Portugal startup Veniam acquired by Nexar

Last August, the Israeli Tech company Nexar, which is currently the largest collector of vision data from vehicles in the US, announced the acquisition of Veniam, a Portugal-based company created under the scope of the CMU Portugal Program by pioneering technology researchers João Barros, former CMU Portugal National Director and Susana Sargento, CMU Portugal Scientific director. Over the last decade, the startup became a leading provider of intelligent networking for the internet of moving things led by João Barros as CEO, who will now assume the role of Nexar's chief platform officer.
