Coronavirus Advice
CIRAS Launches New Web Page with Coronavirus Advice

Amid this uncertainty, CIRAS is seeking to provide clarity for Iowa companies who are worried about the impact of the disease, formally known as COVID-19.

CIRAS recently launched a new webpage at www.ciras.iastate.edu/coronavirus targeting current strategies for companies to prepare for and respond to the impact of COVID-19 on their operations.

The page, which will be updated frequently, contains links to the latest news and educational support for companies with questions about the virus. The page, which will be updated frequently, contains links to the latest news and educational support for companies with questions about the virus. The page, which will be updated frequently, contains links to the latest news and educational support for companies with questions about the virus.

Businesses should monitor that website regularly and feel free to contact CIRAS with any questions. Contact Marc Schneider at maschn@iastate.edu to add your company to the list of businesses who have been reached.

Upcoming Conferences, Trainings, & Workshops

Dubuque, Iowa, a major hub of tourism and recreation, saw attendance and revenue trends that were more optimistic in the months after CIRAS offered its free business assistance to the city's tourism industry.

Over the next few months, CIRAS offered online training sessions for communities in Iowa that were impacted by the coronavirus to provide information and tools to help them navigate the pandemic.

NDE Testing Helps VT Industries Save Time, Avoid Costs

A Holstein, Iowa, maker of doors and countertops saved time and money last summer after CIRAS experts helped the company quickly identify problems with two potential products.

CIRAS helped pinpoint the cause of cracking discovered during inspections of shipments from a supplier.

Aron Fleischmann, an engineer with VT Industries, said his company will avoid tens of thousands of dollars in potential warranty work because CIRAS helped pinpoint the cause of cracking discovered during inspections of shipments from a supplier.
