NDE Testing Helps VT Industries Save Time, Avoid Costs

A Holstein, Iowa, maker of doors and countertops saved time and money last summer after CIRAS experts helped the company quickly identify problems with two potential products.

Aron Fleischmann, an engineer with VT Industries, said his company will avoid tens of thousands of dollars in potential warranty work because CIRAS helped pinpoint the cause of cracking discovered during inspections of shipments from a supplier.

"CIRAS helped us avoid a problem that could have been a lot worse," Fleischmann said. "Our experts diagnosed the root cause of cracking during our first inspection, whereas the supplier thought the cracking was caused by the supplier's material."

The company quickly made changes to its processes to stop the cracking, saving the company time and money.

Brings Big Benefits

"The training I attended was very valuable," Fleischmann said. "It helped me get a better understanding of the importance of making sure our customers are satisfied with our products."

"We will continue to implement the changes that CIRAS recommended," Fleischmann said. "The savings are already starting to show up in our profit and loss statements."
