Upcoming Sessions:

- **GWTeach Apprentice Teaching Scholarship:** Applications are due by September 13th, 2020. Successful applicants receive a stipend of up to $2,000 to support their experiences. For more information, visit [GWTeach.gwu.edu](http://GWTeach.gwu.edu).

- **Miro:** Miro is a collaborative whiteboard platform designed for educators to use in their virtual classrooms, including online labs, simulations, discussion boards, and whiteboards. It is great for teachers thinking of bringing concept maps, sorting cards, and collaborative whiteboards to their virtual environment. If you are able to, have one camera for your face and another for the content you want to share. Try to be as detailed as possible if you're teaching asynchronously. Misconceptions and lower-level thinking can be addressed through the use of these tools, teachers would never be able to catch these mistakes if they were teaching face-to-face. However, without video, teachers would never be able to catch these mistakes if they were teaching face-to-face. Without audio, students would never be able to follow an asynchronous session. There are many platforms designed for educators to use in their virtual classrooms, including online labs, simulations, discussion boards, and whiteboards.

- **Virtual Ice Cream Social:** GWTeach always welcomes its students back with an ice cream social at the start of each new semeser. This year, we had to go virtual to keep our community safe. Last Thursday, GWTeach student Jordan Bower and her friends hosted a virtual ice cream social for the GW community. Yum! We served ice cream from Good Humor, and members also dropped by, giving us updates on their lives as successful teachers and graduate students. We had breakout rooms multiple times, so everyone had a chance to see everyone every day in the office!
