AI helps US compounder detect recycled resin odors

As organics recycling expands, composters are continuously exploring market options. "As compost volumes grow, policy and research help boost market expansion As compost volumes grow, policy and research help boost market expansion..."

How to (Ethically) Get Rid of Your Unwanted Stuff

Effective EPR is often cited as a necessary piece of the puzzle in addressing the current recycling challenges and concerns over single-use product pollution. In the past few years, there has been growing attention to EPR for packaging and paper products (PPP) in the U.S., and it is only accelerating.

Corporations’ Ambitions to Curb Plastic Vs. What They are Actually Doing

"It was a war on plastic that, it seemed at the time, might actually curb plastic's environmental excesses. That was so 2018. Today, the skirmishes have largely faded from public attention. The plastics problem hasn't gone away, of course — quite the opposite."
