MASON SCIENCE COMMUNITY

Fernandez, Norahley Valeria

It’s Valeria’s book. Preparing the next great generation to save our future

Fernandez, Norahley Valeria

As Breast Cancer Awareness Month comes to a close, it’s fitting to highlight #MasonScience researcher, Virginia Espina. Espina’s research focuses on understanding the molecular mechanisms of breast cancer, particularly in the context of triple-negative breast cancer (TNBC), a particularly aggressive form of the disease.

Message from the Dean

As President, I strongly encourage you to participate in the activities and sessions planned for Mason Day. These events present opportunities to welcome a new era and celebrate as a community.

Research & Discovery

Espina recently appeared in the Grand Challenges panel at President Washington's Investiture event. In her remarks, Espina discussed how environmental elements impact cancer risk and how her research contributes to finding solutions.

In the News

On October 27, 2021, President Gregory Washington officially welcomed the next leader of our university. Over the last week, the Mason nation has been celebrating the investiture of our eighth president, Dr. Gregory Washington. Usually held at the conclusion of the president’s first year, this academic ceremony presents opportunities to welcome a new era and celebrate as a community.
