After consultation with Academic Personnel Services, CBO determined that several fixes were needed in Task 2.2, Budget Amount and Labor Contingency Calculation. It was discovered that legacy revenue generated from OCTA Application on Sponsor Initiated Projects not converted for the awards listed in the revenue balance report, the revenue balance was not displaying the correct amount consistently. The Cumulative Research report on the Project Balances with Expenditure Details (PBED) report displays the budget and revenue balance on sponsored projects. Within the Cumulative Research report, a new enhancement was implemented to ensure the correct amount is displayed. The enhancement included validation rules implemented for financial units and projects, ensuring that the correct amount is reflected in the report. This enhancement is critical for accurate budgeting and financial management and will be available for use by budget preparers and financial managers who are familiar with policy and would like to learn about the expense and budgeting process.
