Custom Designs and Modifications

Does your project need a custom design or special product modification? ANP Lighting has 100 years of combined experience in designing and manufacturing lighting projects to your specifications.

Our in-house team of experienced lighting engineers will work with you to develop your custom design, or modifications to standard products. Below, you will find examples of some of ANP Lighting's previous custom projects.

Sierra Bella

Sierra Bella, a beautiful housing development in Southern California, adds a twist to our LA124 fixture and is accompanied by a completely custom post arm.

The fixture is modified with a ball finial on the bottom side of the fixture, giving it an elongated look and more decorative feature. The post arm is a combination of cast aluminum scrolls and aluminum tubing to create an elegant design.

1st Street Bridge Renovation

The historic 1st Street Bridge over the Los Angeles River is one of the City's most recognized historic-cultural monuments. When the bridge was renovated, the designers recreated light fixtures resembling those used in 1929 to maintain its historical value.

The City of Los Angeles then looked to ANP Lighting to fabricate the custom period lantern and large scale bracketed arm. Designers provided their design to our engineering team and our in-house foundry developed a custom re-creation of the distinctive lantern and post mount arm, to match the historic architecture of the bridge.

Dana Point Lanterns

Dana Point, California is a city known for its history. Driving through Dana Point's Lantern District, you will notice many colored lantern themed streets. Such as: Golden Lantern Street, Amber Lantern Street, Silver Lantern Street, Cooper Lantern Street, Violet Lantern Street and Blue Lantern Street.

These streets are some of the oldest existing streets in the Dana Point area that date back to the 1920's! ANP Lighting was honored to provide the custom colored glass and lanterns for this historical city.

CRACK'D Kitchen

CRACK'D Kitchen & Coffee is a culinary driven gourmet breakfast eatery located in Andover, Massachusetts. The design team showed interest in using ANP Lighting's M+D Magnolia fixture for the interior of their new restaurant.

Original Magnolia

Custom Magnolia

ANP Lighting's team came up with a clever way to modify our original Magnolia fixture into a custom fixture that mimicked a cracked eggshell.

This one of a kind look, combined with a soft-lensed LED lighting solution provides a comfortable environment for the restaurant's patrons to enjoy the space in a truly unique and interesting way.
