LIFE in the third year of the 'Something Very Fishy' musical theater. Michael Childress and his Creative Inquiry team delivered the message of marine conservation to our community and broader society. We provided a number of opportunities to achieve this goal and several of our alumni were highlighted for their successes.

We are proud of the opportunities we have offered students to achieve this goal, and we have prepared the next generation to solve tomorrow's biological challenges through innovative teaching, mentoring and signature experiences.

The last year has been interesting and challenging for everyone. Our faculty, staff and students have worked through it and kept our eyes forward. We made time to recognize the work of our graduate students, postdocs, and visiting scholars.

Goal #1: Inspire and prepare the next generation to solve tomorrow's biological challenges through innovative teaching, mentoring and signature experiences.
