Non-Event Reimbursement Expense Report Processing Time

IPPS is no stranger to the staffing shortages many of us at UC San Diego are experiencing. As a result, we must make some adjustments and extend the processing time to approve non-event out-of-pocket expense reimbursement requests. Submitters should anticipate a **minimum** processing time of 10 business days from the date the request is received by IPPS, provided that required receipts and valid business justifications are included. Please know that this was not a hasty decision and we are doing everything in our power to ensure you are being properly supported. We are currently processing out-of-pocket expense reimbursement requests received in late December 2022 and are working diligently to become current.

To avoid out-of-pocket expenses and a delay in receiving reimbursements, use one of the university’s purchasing/payment channels such as the Procurement Card, Amazon Business and Oracle Procurement. Reference our Procure-to-Pay Decision Matrix and the Procurement Card Blink page for more information.

Flying on Federal Funds?

Federal regulations require the use of U.S. carriers for travel that will be reimbursed from federal grants and contracts, including federal-flow-through contracts and grants. Before making arrangements for air travel for UC San Diego business, find out about the funding type and, if applicable, ensure the booking is in accordance with the Act. If you feel an exception applies, consult with your business office as certification may be required. Balboa Travel and Kahala Travel are able to assist in flight selections, but compliance with the Fly America Act is the responsibility of each department. Concur displays compliant flights in the flight search results when you click on the shield icon or the information icon.
Cost Transfer Notifications
As part of the 22D release in December, there was an automatic format update to Cost Transfer email Notifications. This change includes more information for end users. In addition to this Oracle-delivered update, we are working to customize the Cost Transfer notification to provide as much information as possible to support approvers. Current timeline for UCSD specific customizations is the end of February.

User Name on select Cost Transfers
A user has reported that some cost transfers are referencing the Initiated By and Approved By as a different user than the person who actually took action. This has been reported to Oracle and they are working on correcting this bug. This does not seem to be a widespread issue but if you do observe this issue, please know that we are already working with Oracle on it. Feel free to submit a Services and Support request if you have any questions.
