How to Resolve POETAF/COA Failed Validation Errors in Concur

After a Concur Request or Expense Report is submitted, chart string information is validated against data in Oracle. If your Concur document was returned due to a COA or POETAF validation error, the resolution will depend on the type of chart string error. Reference our returned due to a COA or POETAF validation error, the resolution will depend on the type of chart string error. Reference our information is validated against data in Oracle. If your Concur document was

Oracle Redwood Overview eCourse

Oracle Redwood January 2022 Launch is around the corner! Please review our upcoming UI changes in the Oracle Test Non-Production Environment. Since this is a test environment, you can view the upcoming Oracle Redwood UI changes in the Oracle Test Non-Production Environment and not see:

What is changing?

- Slightly darker background
- Overall coloring using a different color palette, layout, look and feel:
  - Ability to search by initiator added to Transfers summary
  - Display of completed information only (not just most recent)
  - Ability to search by Project Owning Org on more reports
  - Funding Source and High Risk Flag now visible on more reports

Additional Resources for Concur - Oracle Redwood Toolkit

- PP Invoice Best Practices
- PPM Invoice Best Practices
- Updates to the Cost Transfer Email Notifications
- Updates to the Cost Transfer Emails that are sent to PIs
- [Review this short eCourse for a comprehensive overview of how to navigate the new Oracle Theme.](https://www.youtube.com/watch?v=Q5Q5Q5Q5)
- Visit Our Website - Subscribe To Our YouTube Office hours are recorded and video links are shared in the comments.
