ANP Lighting

EQ Collection

The EQ Collection is inspired by the balance between performance, scale, and visual experience. Our design and engineering team created an exciting new equilibrium – an unparalleled site lighting collection with a unique blend of form, function, and technology.

EQ Post Top

EQ post top luminaires are offered in three distinct sizes, six lumen packages and can be configured with a single or twin strut design to easily adapt to a variety of architectural settings. The flush mount adapter eliminates any exposed hardware as the fixture transitions to the pole.

EQ Wall Mount

Wall mount configurations with EQ luminaires maintain the same seamless and elegant transition, adding to the versatility of the EQ Collection.

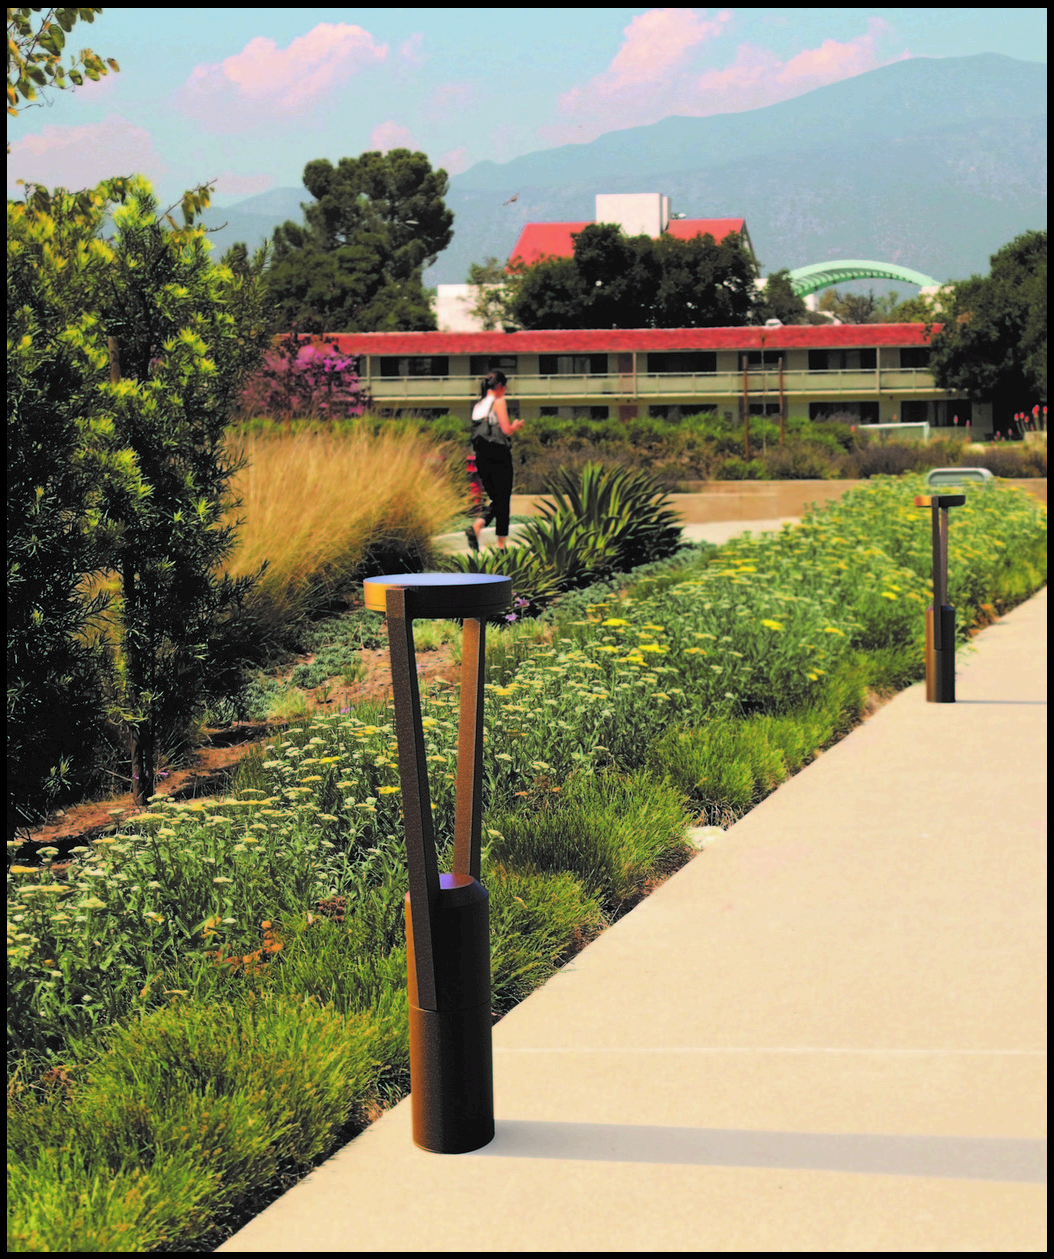

EQ Bollard

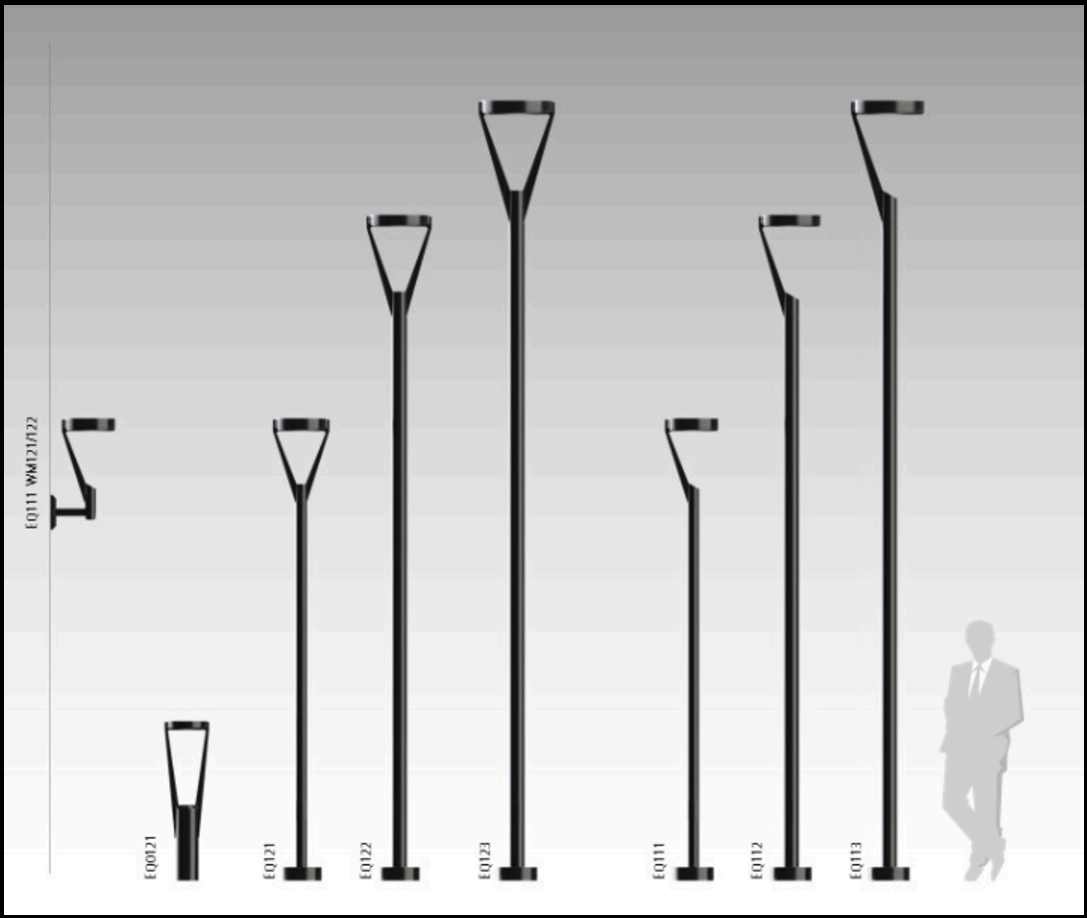

Carrying on the EQ design language, the EQ Bollard is the ideal companion product and offers a robust set of features.

Design Freedom

Truly unmatched in its versatility, the three post top luminaire sizes provide the proper scale, regardless of the pole height

Comfort & Performance

The latest in LED light guide technology provides a harmonious balance between performance and visual comfort. Six lumen packages and four distribution types allow the proper lighting for any application.
