
**Introduction to Oracle Procurement & Payables eCourse**

This course is a great introduction for those new to Oracle Procurement. It covers the basics of purchasing operations, including supplier management, requisitioning, and purchase order creation. Participants will learn about the importance of controlling costs and ensuring compliance with procurement policies. The course is designed for individuals who are responsible for managing procurement processes within their organization.

**How to Lift PO Commitments**

With the creation of the new PO Balances report in the P2P Panorama, determining how to best lift PO commitments (close POs) is a little easier. Refer to this report for a consolidated view of all open POs and their balances. Additionally, the report shows the current status of each PO (Open, Closed, Released, or Lifted), making it simple to identify which POs need to be closed.

**Preferred Names in Concur**

We have received an increase of inquiries from travelers whose preferred name applies to them, we recommend that you call Balboa Travel [(888) 617-5005](tel:8886175005)] if that does not work. Please submit a case via [case report](#) over the phone to make your airfare booking. You will be able to provide them names while also allowing for booking directly through Concur. If this situation in Concur does not match their legal identification documents that are required, the team has resolved bugs in the system specific to the action of creating an ESR/FIS journal. A journal correction was made centrally to reverse the duplicate GL transaction that was created.

**Accounting**

Shortly after go-live, the ESR-FIS design leads determined that a change to the IFIS & PPS screen “Depreciation” was necessary. Beginning this fiscal year, the IFIS and PPS team has made a change to the IFIS & PPS screen “Depreciation” to include a new field named “Box Type” that can be used to track different types of equipment. These changes will allow for more accurate tracking of depreciation costs for specific assets. The team has also added a new field named “Box Type” to the IFIS & PPS screen “Depreciation” to track different types of equipment. This will allow for more accurate tracking of depreciation costs for specific assets.
