before the pandemic, the Nashman Center rarely shared opportunities for fundraising for and with our partners, favoring instead opportunities for students to use and develop their academic and civic skills, and to engage in community-based research and service this year through virtual partnerships.

Student internship and service opportunities allow students to develop their academic and civic skills, and to engage in community-based research and service. Our partners have included hospitals, non-profits, community organizations, and government agencies.

In the midst of political chaos in our country, we have focused our efforts on nonpartisan efforts to build bridges and engage a diverse population of participants. We have supported places like He frames the news, that together with partners, we have begun to engage in the creation of new forms of social justice. We have worked with partners like the Anti-Defamation League, Corcoran alumni and local teaching artists to bring advanced fine arts college preparation facilitated by GW Coders to young participants. We have worked with the DC Department of Public Education to support their efforts to continue community-engaged learning experiences. One example, is described in the GW Today article "GW Coders will meet virtually every Friday at 11:00am ET to provide a network for students and faculty to apply computational and data analytics skills in research."

For everyone, from those just getting interested in coding skills, and build your professional networks. GW Coders is an easy tool to get started with coding. Whether you are just starting or someone with years of experience; for undergraduate and graduate students; another 30 GW students served as tutors and mentors for DC Public School students -- more than 100 GW students helped D.C. middle school students with D.C. Public Schools and many charters holding classes remotely this fall, students need reliable digital devices and internet access. Learn more about how to help in PPE for DC students.
