CMU in the Media: Stretchtonics' researcher, Manuel Carneiro, has created a flexible, reusable and low cost electroencephalogram

The project was developed at ISR-Coimbra's "Soft and Printed Microelectronic" Lab as part the CMU Portugal Program research project - Stretchtronics - during Manuel Carneiro Master's thesis. The researcher was supervised by Mahmoud Tavakoli, Professor and Director of the ISR-Coimbra Lab and his thesis was recently distinguished at the "Fraunhofer Portugal Challenge 2019" competition.

CMU Portugal Inside Story: Luís Borges experience as a first year Dual Degree PhD student

This year, Luís Borges started his **PhD in Language Technologies**. Excited about this new experience he told us: "I also applied for a PhD at IST, for backup reasons, but when I discovered the CMU Portugal program, where I was able to study in one of the world's greatest universities, and also to spend two years in the United States, I truly stopped caring about any other options."

Especially for those thinking about applying to a CMU Portugal Program, you should read the full article.
