$10.00

February 13, 2022
5:00 to 6:30 p.m. | Exploratory Hall, room 3301 or Zoom

Mason Math Alumni / Student Conference

Join Mason’s Department of Mathematical Sciences for an opportunity to connect students and alumni while highlighting the success of Mason’s math program.

February 2, 2022 | 4:30 to 7:30 p.m. | Johnson Center Cinema

Free Screening: Oliver Sacks: His Own Life

Join Mason’s Interdisciplinary Program in Neuroscience for a free screening of the documentary and panel discussion. The screening will take place at the Johnson Center Cinema, 4:30 to 7:30 p.m. on February 2, 2022.

Mason’s Department of Mathematical Sciences invites you to the Mason Math Alumni / Student Conference on February 13, 2022, from 5:00 to 6:30 p.m. in Exploratory Hall, room 3301 or Zoom.

Applications for the 2022 ASSIP program are now open. If you know a student who may be interested, please apply.

February 6, 2022 | 11:59 p.m.

ASSIP 2022 Session:

Join Mason’s Interdisciplinary Program in Neuroscience for a free screening of the documentary and panel discussion. The screening will take place at the Johnson Center Cinema, 4:30 to 7:30 p.m. on February 2, 2022.

Upcoming events in the Mason Science community

1. Mason Math Alumni / Student Conference on February 13, 2022, from 5:00 to 6:30 p.m. in Exploratory Hall, room 3301 or Zoom.

2. Applications for the 2022 ASSIP program are now open. If you know a student who may be interested, please apply.

3. ASSIP 2022 Session: Join Mason’s Interdisciplinary Program in Neuroscience for a free screening of the documentary and panel discussion. The screening will take place at the Johnson Center Cinema, 4:30 to 7:30 p.m. on February 2, 2022.

The Mason Science community lost two dear colleagues, Tom Lovejoy and A. Alonso Aguirre. Their passing serves as a reminder of the importance of resilience in the workplace.

As the new semester begins, we are coming off a winter break that offered at least some moments of respite from the challenges of the COVID-19 pandemic. While not completely free of its effects, the break allowed for a reset so that we could return to the workplace with renewed energy and focus.

Both had illustrious scientific careers, focused on environmental causes while inspiring and enthusiastically educating the next generation of scientists.

We just experienced a very difficult year, one with many changes. The Delta and Omicron variants of SARS-CoV-2 continue to disrupt our lives and we continue to endure the pain of loss.

The Mason Science community also has your back if you or your students feel a sense of overwhelm.
