**Contents of this Month's Update:**

- In a recent podcast, CINA Principal Investigator Dr. Jodi Quas discussed new research on forensic interviews for minor victims of human trafficking.
- Authors from multiple disciplines, including CINA Director, Jim Jones, and Security Studies Program Director, Gail Kennedy, probe the ways in which pandemic-associated conditions interact with crime and subversion in three different states.
- Shelley, probe the ways in which pandemic-associated conditions interact with crime and subversion in three different states.
- The research team, under the leadership of CINA Director, Jim Jones, and Security Studies Program Director, Gail Kennedy, is focusing on learning from each of these activities, the interconnectedness of our problems, and the work of the Department of Homeland Security.
- The team has made new connections and is forming a new partnership with the DHS Privacy Office.
- CINA is working with key stakeholders, including academics, company leaders, and law enforcement agencies, to advance research on technology.
- CINA is working with key stakeholders, including academics, company leaders, and law enforcement agencies, to advance research on technology.

**Research**

**CINA and the DHS Privacy Office**

The first step in the partnership with the DHS Privacy Office was a two-day meeting on February 7 and 8. The meeting involved brainstorming with key stakeholders: academics, company leaders, and law enforcement agencies. The goal was to advance research on technology that can be applied within the context of the department's operations and missions.

The meeting was facilitated by the CINA team, led by CINA Director, Jim Jones, and Security Studies Program Director, Gail Kennedy. The team discussed the need for a secure and efficient way to share data and fulfill missions while protecting privacy.

**The Future of Counterfeiting:**

This month, CINA hosted students and faculty for an event focused on the future of counterfeiting. The event featured presentations by industry leaders and academic experts. Key topics included shifting patterns in enforcement, opportunity, and diversity and inclusion.

**The Future of Counterfeiting: Shifting Patterns in Enforcement, Opportunity, and Diversity and Inclusion**

The event was attended by industry associations, law enforcement agencies, and other stakeholders. The event included discussions on the current and future state of counterfeiting, with a focus on innovation and technology. The event provided a platform for sharing best practices and learning from each other's experiences.

**CINA Welcomes Luke McBride**

After serving as CINA's Financial and Administrative Specialist, Luke McBride has joined the Center for Crime Analysis. Luke brings a wealth of experience in fiscal and administrative roles, having previously held positions at the National Institute of Justice and Virginia Tech.

**CINA Welcomes Luke McBride**

Luke McBride's experience in fiscal and administrative roles at the National Institute of Justice and Virginia Tech has prepared him for his new role at CINA. He will be responsible for supporting the administrative needs of the Center, working closely with key stakeholders to ensure the smooth operation of the organization.

**The Future of Counterfeiting: Shifting Patterns in Enforcement, Opportunity, and Diversity and Inclusion**

The event was a success, with attendees from across the industry sharing insights and experiences. The event highlighted the need for continued collaboration and innovation in the fight against counterfeiting.

**A World Emerging From Pandemic:**

This month, CINA hosted students and faculty for an event focused on emerging from the pandemic. The event featured presentations by industry leaders and academic experts. Key topics included the impact of the pandemic, lessons learned, and future directions.

**A World Emerging From Pandemic**

The event was attended by industry associations, law enforcement agencies, and other stakeholders. The event included discussions on the current and future state of pandemics, with a focus on innovation and technology. The event provided a platform for sharing best practices and learning from each other's experiences.

**CINA Science Committee members recognized with Presidential Awards for Faculty Excellence**

Two CINA Science Committee members were named recipients of the 2022 Presidential Awards for Faculty Excellence, honoring Mason faculty members for their contributions to the university.

**CINA Science Committee members recognized with Presidential Awards for Faculty Excellence**

The Presidential Awards committee review team chose Allison Redlich and Louise Shelley as recipients of the 2022 Presidential Awards for Faculty Excellence. The awards recognize their groundbreaking efforts in research, teaching, and service to the university.
