

Dear Colleague,

We hope everyone has been enjoying their summer. I sure have! And what a busy time of year, as many of you have clients traveling to Europe and elsewhere.

Europe is certainly back on the globetrotter radar. Iceland has already welcomed over 1.8 million visitors this year and Athens has been named one of the Top 10 most popular city destinations for the summer of 2023.

We're thrilled to announce that Iceland ProCruises has made their 2024 Early Bird Rates available for booking.

There's lots more exciting information below, so don't forget to have a peek. And enjoy the rest of summer!

All the best,

The Emerging Destinations team

Discover Naxos, the heart of the Aegean Sea

Let's travel to Naxos, the largest island of the Cyclades archipelago, mostly known for its pristine beaches, cultural sites, charming villages, vibrant nightlife, and the world-famous attraction the Portara, a massive marble doorway that stands at the entrance of an ancient Temple of Apollo. It was never completed but the Portara, though, still stands as a testament to the island's rich history welcoming all visitors.

What's That Wild & Crazy Bird?

Icelanders call it the Lundi, but to the rest of the planet it's the colorful little Puffin. In most of its range, the birds are rarely seen. But in Iceland, you have a good chance to meet a whole colony during the summer chick-raising season.

Of the approximately 12 million Puffins worldwide, about 60% live on or around the North Atlantic island. Around mid to late April, the birds return from their winter domicile and settle on the grass-covered upper ledges of Iceland's sea cliffs. Each pair returns to the same den they inhabit each year.

Whats Hot in Iceland? The Lava Show!

If one of Iceland's four dozen volcanoes isn't erupting while you happen to be on the island, don't stress. You can still feel the heat at the award-winning Lava Show, which creates glowing molten rock before your very eyes.

This is no sideshow circus trick. They really do make lava by superheating volcanic rocks collected from old lava fields to temperatures as much as 1,100°C (2,000°F) and then pouring the molten liquid into an ice-filled basin just feet from the mesmerized audience. [Read More](#)

Introducing the Icelandverse

The Icelandverse is unlike any other open-world experience with "-verse" in the name. That's because unlike those other "verses" it's actually real. And you don't need a funny-looking VR headset.
