Time to celebrate

by Fernando Miralles-Wilhelm

477 days. It's been that long since we've been able to celebrate directly with our students at an in-person graduation event.

Thanks to the COVID-19 pandemic, we have kept safety precautions as our focus and have had to limit contact at our traditional graduation festivities for the health and well-being of our Mason Science community. Instead of the traditional degree celebrations and Mason commencement ceremonies, for the past year, we've pivoted to a virtual format encouraging online and social shout outs to acknowledge our graduates' awards and significant accomplishments.

We continue to follow CDC precautions, yet based on current State of Virginia recommended protocols, we now have an exciting opportunity to welcome our students back to campus for graduation—and we want to make the most of it.

We quickly need to let our graduating students know what's happening and we need your help. Please

speak to your Class of 2021 students directly or use this slide in the class discussions or via email to let them know **5 p.m. EST on Friday, April 16**, is their deadline to choose between two options.

IN THE NEWS

Deutsche Welle features Mason Scientist in mini-documentary about Mars

The German international broadcaster, *Deutsche Welle*, interviewed Physics and Astronomy Associate Professor Erdal Yiğit for a mini-documentary about Mars. Yiğit recently published a study in *Geophysical Research Letters* highlighting the connection between Martian dust storms, waves, and atmospheric loss. Sharing the video for the Turkish speakers in our Mason Science community.
