Join Mason faculty and students to watch and discuss the documentary Coded Bias, which investigates bias in artificial intelligence algorithms and facial recognition software.

Wednesday October 13, 2021, 7 to 9 p.m., JC Cinema

Coded Bias Screening and Discussion

Join the Department of Atmospheric, Oceanic and Earth Sciences for a quasi-monthly discussion of recent climate and weather events. Come with an interesting news item, share your thoughts, or just come to listen.

October 8, 2021 | 2 to 3 p.m.

Hispanic Heritage and Disability Awareness Month: Case Studies Roundtable

Mason University’s eighth President is the deadline for faculty to order regalia, at no charge, for the Investiture of Gregory Washington as George Mason University’s eighth President.

Deadline to Order Regalia for President Washington’s Investiture

Mason PhD’s effort to save the Black Rhinoceros

by Elizabeth Grisham

Camille Goblet, PhD candidate, a Mason PhD’s effort to save the critically endangered black rhinoceros by developing an expanded population of the species.

Plavchan speaks to bridging artificial intelligence algorithms, he advises students in computational sciences and informatics graduate programs.

More on the partnership

Mason, FARO announce powerful collaboration.

Based on our forensic program events last week, we can add one more innovative, impactful partnership to our list—FARO.

Mason’s partnership to advance scientific training and research expertise at our cutting-edge facilities will influence the next generation of forensic professionals and their students.

Mason and FARO announce powerful collaboration.

I joined our forensic science colleagues at the ribbon cutting of our FARO Forensics Lab, the first training facility, one of only eight in the country. The connection of their forensic technology and our scientific training and research expertise at our cutting-edge facilities will influence the next generation of forensic professionals and their students.
