Artificial Intelligence algorithms and facial recognition software.

Join Mason faculty and students to watch and discuss the documentary Coded Bias, which investigates bias in
climate and weather events. Come with an interesting news item, share your thoughts, or just come to listen.

October 8, 2021 | 2 to 3 p.m.

Climate Dynamics Seminar: Current Climate Conversation

The deadline for faculty to order regalia, at no charge, for the Investiture of Gregory Washington as George

FARO Technologies, Inc and Mason University partner to advance the field of forensic science.

Mason Science Comm 1982, the world’s first FARO-certified forensic science laboratory. The partnership gained media attention
and established Mason’s place as one of the nation’s premier programs in its field with a partnership
of its kind in the world, and the public unveiling of Mason’s outdoor Forensic Research and
Training facility, one of only eight in the country. The connection of their forensic technology and our
departments is integral to advancements in the field of forensic science.

I joined our forensic science colleagues at the ribbon cutting of our FARO Forensics Lab, the first
facility of its kind in the world, and the public unveiling of Mason’s outdoor Forensic Research and
Training facility, one of only eight in the country. The connection of their forensic technology and our
departments is integral to advancements in the field of forensic science.

Plazhov explores using technology to improve criminal justice professionals and their students.

For decades, criminal justice professionals have had to keep up with the latest technology to stay
competitive in their field. Now, Mason University is partnering with FARO Technologies, Inc. to
improve their forensic science program and help students learn from an industry leader.

Plazhov has previously worked with FARO Technologies, Inc. to help the company develop
its FARO Forensics Lab, which is the world’s first FARO-certified forensic science laboratory.

By partnering with Mason University, FARO is able to provide their customers with a
unique educational opportunity. The university will be able to offer coursework and training
opportunities for students and professionals in the forensic science field.

This partnership is just one example of how Mason University is working to advance
innovative education and research in the field of forensic science.
