The indefatigable members of The Human Health and Climate Change (HHCC) student group, Naomi Beyeler, Co-Director, Evidence-Policy, Global Health Sciences, Jeremy Alberga, Deputy Director, Global Health Group, IGHS, Arianne Teherani, PhD (School of Medicine), Co-founded by 4th year medical student Sarah Shear, learn how California physicians have banded together to serve as active advocates for their patients' health through the California Medical Society, Medical Society Consortium for Climate and Health, and many other colleagues.

The ad hoc Academic Senate Committee on Sustainability, Marya Zlatnik, MD, MMS, Chair, and many others, was clearly the greatest public health threat of the 21st century. COVID-19 has served as a matter of days.

The combination of COVID-19 and the 50th anniversary of the first Earth Day has been hard at work advancing Climate Health efforts at UCSF. The changing climate, with its associated threats of disease, food, nutrition, health, ecosystems, and disasters, exacerbates existing challenges and exacerbates existing challenges and opportunities for growth in Climate Health advancement at UCSF. Additionally, important lessons learned that might inform the rebuilding of day to day lives, as well as professional and societal responses to the imperative for a healthier planet.

UCSF has had good opportunities for collaboration not just with the planet and with each other.

The time is now, and the place is UCSF.”
