———

The 60 faculty, students, staff and community members who attended the Dialogue met together and in

breakout groups to discuss Research, Education/Clinical Care and Advocacy.

Here are more near-verbatim comments and contributions from the meeting can be found

accelerate progress toward a healthier planet.

5. The UCSF community needs enhanced pathways to translate Climate Health research into education and

address Climate Health issues. Partnerships should be encouraged with multiple entities, such as public

Health centralized hub to facilitate collaborations and mitigate the barriers of space, financial support, and time

that discourage busy people from getting started.

4. UCSF has strong local, national, and international partnerships that should be expanded and nourished to

4. UCSF has strong local, national, and international partnerships that should be expanded and nourished to

opportunities at UCSF. By instituting a platform for Climate Health communication, the Newsletter aims to

links are shared that will familiarize readers with a few of the many Climate Health activities and

challenges and opportunities for growth in Climate Health advancement at UCSF. Additionally, important

During which 60 faculty, students, staff and community health professionals identified strengths,

In the meantime, this first Newsletter shares the highlights of a (pre-COVID-19) Climate Health Dialogue,

The two topics—climate and pandemics—are intricately related, and next month’s Newsletter will consider

The combination of COVID-19 and the 50th anniversary of

Earth Day offers both humbling and energizing

The time is now, and the place is UCSF.”

“We have the opportunity to make a significant difference to planetary and patient health in the

21st century. The time is now, and the place is UCSF.”
