Lake Forest College students have an opportunity to enter the Venture Design Challenge.

The Anti-Prick Project joined the Venture Design Challenge to solve the problem of lack of options for the safe disposal of medical needles and other sharp medical objects throughout campus. This will ensure students, faculty, trustees, alumni, and visitors can safely and discreetly dispose of their needles and other sharp medical objects.

Rajamohan's solution is to install safe, secure repositories in the high-use bathrooms throughout campus. This will ensure students, faculty, trustees, alumni, and visitors can safely and discreetly dispose of their needles and other sharp medical objects.

The Anti-Prick Project joined the Venture Design Challenge to solve the problem. Diayan Rajamohan's '21 solution is to install safe, secure repositories in the high-use bathrooms throughout campus. This will ensure students, faculty, trustees, alumni, and visitors can safely and discreetly dispose of their needles and other sharp medical objects.

The problem: Lack of options for the safe disposal of medical needles and other sharp medical objects throughout campus. This will ensure students, faculty, trustees, alumni, and visitors can safely and discreetly dispose of their needles and other sharp medical objects.

Major: Sociology and Anthropology
Minor: Legal Studies and Philosophy
Team Member: Diayan Rajamohan
Venture type: Social Innovation Venture

ENTP students under the direction of Professor Thomas have successfully competed at TCU Values and Ventures Competition (www.neeley.tcu.edu/vandv) or e-fest (eix.org), email drupplerh@TCU.edu.

Everyone is welcome to attend the Venture Design Challenge semi-finals. The semi-finals will take place on Saturday, February 29th from 9:30 am – 1:00 pm in the Lily Reid Holt Location: Calvin Durand Hall Time: Noon to 1:00 pm

Applications are now open. Deadline: Tuesday, March 3rd at 5:00 pm

If you are interested in competing in TCU's Values & Ventures Competition, please sign up for the Venture Design Challenge and see you there!

On Saturday, February 7th, the college hosted its annual TEDx talk to a sold-out crowd. Five speakers approached the topic from a variety of vantage points, making for a lively, thought-provoking afternoon. As an audience, we were inspired, challenge, and offered innovative mindsets.

In our upcoming newsletters, we will take a deep dive into each of the entrepreneurial and innovation topics that were covered. Stay tuned for more insights and perspectives on how to live up to your full potential, how to develop innovative mindsets, and how to navigate the future. It will allow them to pursue risks and challenges necessary for growth, development, and learning.

And if you find yourself repeatedly making bad decisions or anxious when facing critical choices, you need to activate your resilient mindset. If you are too scared to try because you might face rejection or ridicule or whatever other fear-story you’re telling yourself, you need to activate your shame resilient mindset. If your venture fizzles or goes belly up, you need to activate your failure and shame resilient mindsets.

The mindsets solve the problem of: How do you live up to your full potential? How do you develop innovative mindsets? How do you navigate the future? It will allow them to pursue risks and challenges necessary for growth, development, and learning.

You're Invited: February 24th

Join us for a conversation with Claire Babineaux-Fontenot, CEO of Feeding America.

Lake Forest College Theater Department, in partnership with Entrepreneurship and Innovation News, is excited to announce that Claire Babineaux-Fontenot, CEO of the nation’s largest anti-hunger charity, will be the guest speaker at the February 24th event.
