The Anti-Prick Project wants to make our community safer and more accessible for everyone. We encourage individuals to discreetly dispose of their needles and other sharp medical objects. This helps prevent accidental injuries to those who may get stuck with a needle disposed of in the trash. Proper disposal reduces the risk of injury and the spread of infectious disease. Those most at risk are our janitorial staff who are responsible for cleaning areas where needles might be found.

The problem: Lack of options for the safe disposal of needles across campus, which leads to dangerous situations for all students – especially those with medical needs. Solutions: The Anti-Prick Project has been making progress in developing innovative solutions to this issue. For example, Bobby Inman '20 and Bob McKeon '21 are working to solve the problem with an innovative case that insulates the phone battery. Did you know that at extremely cold temperatures smartphones completely shut down? The Thermobor case is designed to prevent this issue, keeping devices functional in cold environments.

The Anti-Prick Project is working to bring awareness to this issue and develop solutions for a safer campus environment. Join us in making a difference.

ENTREPRENEURSHIP AND INNOVATION NEWS

---

You're Invited: February 24th

You're invited to this week's TEDx at Lake Forest College! The topic: Boiling Point. In Brief: TEDx at Lake Forest College

Date: Monday, February 24th

Location: Calvin Durand Hall

Time: Noon to 1:00 pm

Date and Time: February 24th, Noon to 1:00 pm

Activating the mindsets will help our students make better choices and decisions now and in the future. As we encourage our students to think constructively about social innovation or business venture.

From our introductory courses to our senior seminars, ENTP instructors go deep on the entrepreneurial & innovation mindsets and demonstrate why and how they are essential for anyone trying to launch a business.

What do you learn in ENTP?

- Entrepreneurship
- Innovation
- Mindsets
- Success

When you are too scared to try because you might face rejection or ridicule or whatever, you need to dig deep and activate your failure and shame. Then you can start to reframe dysfunctional beliefs.

If your venture fizzles or goes belly up, you need to activate your failure and shame. Then you can start to reframe dysfunctional beliefs.
