The Anti-Prick Project wants to make our community safer and more accessible for everyone. Specifically, and discreetly dispose of their needles and other sharp medical objects. This will ensure students, faculty, trustees, alumni, and visitors can safely navigate our campus currently pose a public health and safety concern. The problem: Lack of options for the disposal of medical waste including injury and the spread of infectious disease. Those most at risk are our janitorial staff.

Did you know our campus is facing a health risk? Needle disposal on the Lake Forest College campus is available to students, faculty, staff, and visitors).

Bobby Inman '20 and Bob McKeon '21 are working to solve this frustrating and dangerous problem with an innovative case that insulates the phone battery.

Did you know that at extremely cold temperatures smartphones completely shut down? And if you are a winter lover, the phones might not work for you. That is why Bobby Inman '20 and Bob McKeon '21 are working to solve this frustrating and dangerous problem with an innovative case that insulates the phone battery.

Join us for a conversation with Claire Babineaux-Fontenot, CEO of Feeding America. She will discuss her founder story and how she leveraged her personal commitments to create a national organization.

turn your wounds into wisdom.

"Turn your wounds into wisdom." — Jeff Bezos

Hello game changers, dreamers, doers, and makers!

"I knew that if I failed I wouldn't regret that, but I knew the one thing I might regret is not trying. So I couldn't let that stop me." - Unknown
