The Anti-Prick Project wants to make our community safer and more accessible for everyone. The Anti-Prick Project joined the Venture Design Challenge to solve this problem. Diayan Rajamohan, an ENTP 220: Entrepreneurial Selling student, is working on this project. He wants to apply what he learned from Professor Thomas in ENTP 270: Product-Market Fit and mobilize resources to solve.

Did you know that at extremely cold temperatures smartphones completely shut down? Bobby Inman ‘20 and Bob McKeon ‘21 are working to solve this frustrating and dangerous problem. Their team, Thermobor, is working to create a safe disposal of needles across campus, which leads to dangerous situations for all students – from Diayan who may get stuck with a needle disposed of in the trash.

The campus is facing a health risk. Needle disposal on the Lake Forest College campus is currently unregulated, and students are encouraged to dispose of needles in the trash. This leads to dangerous situations for all students – from Diayan who may get stuck with a needle disposed of in the trash.

Minor: ENTP
Year: Junior

Team Member: Bobby Inman
Venture type: Business Venture

ENTP students under the direction of Professor Thomas have successfully competed at a national competition every year.

If you are interested in competing at nationals, you can join our Venture Design Challenge Team. The Anti-Prick Project is one of the teams working on this project.

Hello game changers, dreamers, and makers!

― Jeff Bezos

― Oprah Winfrey

In our upcoming newsletters, we will take a deep dive into each of the entrepreneurial and innovation mindsets and demonstrate why and how they are essential for anyone trying to launch a social innovation or business venture.

What do you learn in ENTP?

The entrepreneurial & innovation mindsets are core to our ENTP curriculum and woven into the fabric of the Lake Forest College experience. It will allow them to pursue risks and challenges necessary for growth and in the world.
