and international organization.

Research pertaining to environmental science and sustainability. The biweekly newsletter aims to address pressing sustainability and resilience challenges.

The Symposium will convene key stakeholders to explore the skills, knowledge and attitudes needed for a sustainable future. The African Development Bank and the UN Environment Programme are co-hosting the conference.

Integral to achieving these goals is a fundamental understanding of the transport and transformation of pollutants in the environment. Research on environmental biogeochemistry aims to provide the tools needed to track, model and mitigate pollution.

DEB also encourages interdisciplinary proposals that cross conceptual boundaries and integrate over levels of biological organization or across multiple spatial and temporal scales. Proposals should be submitted to the core clusters (Ecosystem Sciences, Evolutionary Processes, Population and Community Ecology, and Systematics and Biodiversity Sciences).

The following program areas are provided: Advanced Scientific Computing Research, Basic Energy Sciences, Social Science, and the Smart Cities Partnership.

GSS Fellows are embedded within an international sustainability research project for 10 weeks. The program aims to bridge young professionals to career or graduate levels in the field of sustainability.

Dr. Cioffi-Revilla was honored for “distinguished research and service to the advancement of science” by the American Association for the Advancement of Science (AAAS) on May 10, 2019.

Dr. Claudio Cioffi-Revilla is a University Professor.

Dr. Nichols will report to Dr. Aurali Dade, who served as the inaugural Executive Director of the Institute for a Sustainable Earth (ISE). Sheherazade Jafari, School of Conflict Analysis and Resolution, will serve as the acting Chair of the ISE board.

Most recently she has served in several roles at the National Science Foundation (NSF) since 2011, during which time she managed several complex NSF-wide programs that required collaboration with a wide range of stakeholders.

Dr. Nichols holds a PhD in ecology and evolutionary biology from Princeton University and a BS in biology from the University of Michigan. She is a fellow of the American Association for the Advancement of Science (AAAS) and the American Geophysical Union (AGU). Additionally, she contributed to the fourth National Climate Assessment and has published in top sustainability journals including Nature Sustainability and Science.

Dr. Thomas Lovejoy will remain ISE's Scientific Director in addition to his capacity as a Distinguished Professor of Environmental Studies at the University of Connecticut.

Additional information can be found at www.ise.gmu.edu

Gladwell prior to the event.

Gladwell is among a group of leading scientists honored as AAAS Fellows. The awards are presented annually to individuals who have made major contributions to the advancement of science.

The University Professor.

Please feel free to forward the survey to interested groups and individuals at ISE.
