The ISE Newsletter provides up-to-date information on conferences, funding opportunities, and businesses and organizations–so that, together, we can more effectively address the world's challenges.

The 6th International Symposium on Knowledge and Implementation Science (IPAR-6), co-organized by INRAE (Institut National de la Recherche Agronomique) and the University of Parma, Italy, will take place on March 10-12, 2020. The main objective of the Symposium is to address critical knowledge gaps and promote the implementation of sustainable practices. The Global Symposium on Soil Biodiversity is being organized by the Global Soil Biodiversity Initiative and will be held on May 27-29, 2020, in Rome, Italy.

The Global Symposium on Soil Biodiversity is an international event that brings together scientists and stakeholders on solutions to protect soil biodiversity and increase its sustainable use and management. The symposium aims to facilitate information sharing among researchers, practitioners, and relevant local, national, and international organizations.

DEB also encourages interdisciplinary proposals that cross conceptual boundaries and integrate over levels of biological organization or across multiple spatial and temporal scales. Proposals should be submitted to the core clusters (Ecosystem Sciences, Evolutionary Biology, and Social Sciences) or to the DEB 20/25 program, which is designed to address large, integrative, and long-term research goals.

The National Oceanic and Atmospheric Administration (NOAA) is offering a Marine Debris Prevention Program to support regional and local programs that address the problem of marine debris. The program will accept applications on a rolling basis until funds are exhausted.

Other upcoming events include the 2020 Global Landscapes Forum, which will be held in Bonn, Germany, on September 22-24, 2020, and the 2020 Global Symposium on Marine Biodiversity, which will be held in Rio de Janeiro, Brazil, on November 17-20, 2020.
