The Institute for a Sustainable Earth (ISE) is an interdisciplinary research center and international organization. Its mission is to facilitate information sharing among researchers, practitioners, and relevant local, national, and international partners. ISE works with communities, policy-makers, and businesses and organizations—so that, together, we can more effectively address the world's pressing sustainability and resilience challenges. ISE is supported by Mason and partnering organizations.

The Symposium will convene key stakeholders to explore the skills, knowledge and attitudes needed by water professionals and institutions. The meeting will also study how new developments in implementation science can strengthen institutional capacity to enhance water security.

The Global Symposium on Soil Biodiversity is being organized by the United Nations Food and Agriculture Organization (FAO) at its Headquarters in Rome, Italy on March 10-12 2020. The conference will bring together scientists, policymakers, practitioners, and decision-makers from a wide range of disciplines, as well as civil society organizations, to discuss the most pressing issues related to soil biodiversity. The symposium will also provide an opportunity to consider how soil biodiversity can be managed to support ecosystem services and biodiversity conservation.

Agriculture Organization (FAO) at its Headquarters in Rome, Italy on March 10-12 2020.

The meeting will be co-hosted by SDSN USA and the Institute for a Sustainable Earth at George Mason University in Fairfax, Virginia. The event will feature keynote speakers, expert panels, and interactive workshops. It will provide a platform for discussion on the critical need for sustainability and resilience in the modern world. The meeting will focus on the importance of sustainability in all aspects of life, including energy, agriculture, and water.

The meeting will be held on the campus of George Mason University in Fairfax, Virginia. The university is located in the greater Washington, D.C. area and is a hub for research and education. The meeting will be open to the public and will provide opportunities for networking and collaboration.
