WASHINGTON, D.C. (Oct. 14, 2022) — Planet Forward, an environmental storytelling platform, is pleased to announce the 9th Annual Storyfest Competition, a call for applications from storytellers and content creators across disciplines.

The competition seeks to foster innovation in storytelling by encouraging participants to explore new ways of presenting environmental information to audiences. Submissions can be in any format, including video, podcast, or written content, and should be focused on environmental issues.

Supplementary Materials deadline for submitted applications is January 15, 2023. Applicants should carefully review the eligibility requirements, the terms of the fellowship awards, application materials, and any additional requirements for their specific category.

Awards will be made for study in research-based Ph.D. or Sc.D. programs; practice oriented training; and projects related to environmental storytelling. Awards are designed to support the professional development of emerging storytellers and encourage the dissemination of their work.

Applications may incorporate climate change and environmental justice as appropriate. This innovative prize, part of the American-Made Challenges program, asks multidisciplinary teams of young people to consider how technological, scientific, and social solutions can be used to solve real-world environmental problems.

The competition is open to students in the United States or those who have permanent residency status in the United States. Additional information regarding this RA can be found at the following link.

EnergyTech UP: EnergyTech UP is a fellowship program that provides up to $100,000 in funding to early-career researchers in the field of energy technology. The program aims to support research that can lead to new technologies and solutions for energy challenges.

The GSS Scholars Program offers students a two-year summer experience. During the two summers, students will work on research projects related to global sustainability science. They will build their professional network. GSS will cover round-trip airfare to the GSS site. GSS Scholars is a jointly sponsored program by Global Sustainability Scholars and the Sustainability Science & Policy Program at the University of Wisconsin-Madison.

This competition offers students the opportunity to build their leadership and entrepreneurial skills. The winners will be provided with mentorship opportunities, access to funding, and a network of like-minded individuals.

The competition is open to students in the United States or those who have permanent residency status in the United States. Additional information regarding this RA can be found at the following link.

Understanding the Rules of Life Big Idea was to develop predictive understanding of how key proteins interact to perform biological functions. Understanding the Rules of Life Big Idea is a joint effort of the National Institutes of Health and the National Science Foundation.
