The Institute for a Sustainable Earth (ISE) celebrates the 5th anniversary of the 2030 Agenda for Sustainable Development and assigns viewing of a webinar (live or recorded) as homework, and then hosting a discussion follow-on alumni workshop for each exchange on eligible topics/themes. This funding proposal may be based on “business as usual” environments, where international travel, large gatherings, and in-person events have been suspended. ISE envisions a future that integrates over levels of biological organization or across multiple spatial and temporal scales. We propose to support research that applies scientific and engineering principles.

The Division of Environmental Biology (DEB) at the National Science Foundation (NSF) invites proposals to transform environmental science through data and/or software infrastructure development activities. Such activities may be aimed at developing data sharing practices, creating community-based data management systems, or improving existing software tools. The purpose of the NSF’s Office of Cyberinfrastructure (OCI) is to support the development of an open, sustainable cyberinfrastructure to enhance the conduct of scientific research.

The purpose of the National Institute of Allergy and Infectious Diseases (NIAID)’s Multi-Pronged Response to the COVID-19 Pandemic solicitation is to support the development of interdisciplinary and transdisciplinary approaches to address the urgent challenges through data and/or software infrastructure development activities. Such activities may be aimed at developing data sharing practices, creating community-based data management systems, or improving existing software tools.

The National Institute of Environmental Health Sciences (NIEHS) invites applications for the Workforce for Ethical Decision-Making through Role-Playing: An Interdisciplinary Program in Biomedical Research Ethics and Communication. This program provides an opportunity for students to undertake an individualized project in the field of biomedical research ethics and communication that builds on their prior experience and knowledge, and provides them with the opportunity to develop new skills and competencies.

Limited Submission Funding Opportunities:

- Julie Zobel, College of Education and Human Development
- Joanne C. Langan, PhD, RN, CNE MSN ’94, PhD ’99 – Professor, Coordinator of Nursing
- Erik J. Stemmy
- William Miller

Other Upcoming Events:

- Bicycle Commuting 101: Online via WebEx
- Engage virtually with College of Health & Human Services alumni
- Interested in learning more about careers in the sciences?
- In the near future other items such as tools to safely remove face masks and ventilator parts may also be printed.

Congratulations! Your application has been selected for funding. For more information, please contact jwalker8@gmu.edu.
