On the 50th anniversary of Earth Day 2020, join online for an in-class. Professors are encouraged to #MakeClimateaClass by replacing class with a webinar, to execute the desired project goals in a manner that accounts for restrictions on public gatherings, providing a safe and effective alternative for students. DEB also encourages interdisciplinary proposals that cross conceptual boundaries and address the needs of domestic and international organizations.

The ISE Newsletter provides up-to-date information on conferences, funding opportunities, and regional, national, and international sustainability agendas. Not only celebrate the 5th anniversary of the 2030 Agenda for Sustainable Development and the 50th anniversary of Earth Day, but also engage in critical discussions on how we can address the challenges of climate change and environmental degradation.

Environmental Biology is collaborating with the Department of Energy to address this global challenge. Through its user facilities, computational power, and enabling infrastructure, the Directorate for Computer and Information Science and Engineering is inviting RAPID grants for non-medical, non-clinical-care research that can be used immediately to explore how to model the COVID-19 pandemic and its impact on social behavior, and reactivity in the environment (including animal and human health), as well as to develop and evaluate strategies for mitigation and preparedness.

Limited Submission Funding Opportunities:
- Benoit Van Aken, College of Science
- Hadi El Amine, Schar School of Policy and Government
