The Institute for a Sustainable Earth (ISE) is an interdisciplinary research organization focused on addressing critical global challenges. Its mission is to facilitate information sharing among researchers, practitioners, and relevant local, national, and international organizations. The ISE Newsletter provides up-to-date information on conferences, funding opportunities, and research developments.

The 8th World Sustainability Forum (WSF2020) is a significant event, bringing together stakeholders from various sectors to discuss sustainability solutions. Open to funding innovations in research and development, the Global Innovation Fund supports projects that address sustainability challenges.

The AI for Earth Innovation Program is a competitive opportunity for innovators to develop full proposal for Stage 2. Only awardees of Stage 1 will be eligible to submit Stage 2 proposals. The program is designed to support projects that use AI to address sustainability challenges in sectors such as agriculture, energy, water, and transport.

The Civic Innovation Challenge is focused on facilitating information sharing among researchers, practitioners, and relevant local, national, and international organizations. The program is designed to support innovative solutions that address sustainability challenges in sectors such as agriculture, energy, water, and transport.

The Upcoming ISE Pandemic Webinars will cover a range of topics, including the impact of COVID-19 on ecosystem health, public health, and human security. The College of Health and Human Services (CHHS) is an international scientific conference that brings together researchers and practitioners to discuss the latest research and developments in the field.

Additional information about the Upcoming ISE Pandemic Webinars can be found on the ISE Faculty Profiles webpage. The fellowship offers mid-career researchers working in the area of environmental sustainability an opportunity to develop new research directions and tools and perspectives to help participants cross traditional disciplinary and sector boundaries.

For more information about the ISE and its programs, please visit the ISE website. If you would like to add opportunities to the database please contact the Research Development Services office.
