

Editor: Rachel Baugh

Welcome Summer Research Interns

We are thrilled to welcome 18 high school Aspironaut™ Interns from 8 states and 16 undergraduate interns from 8 states plus Puerto Rico.

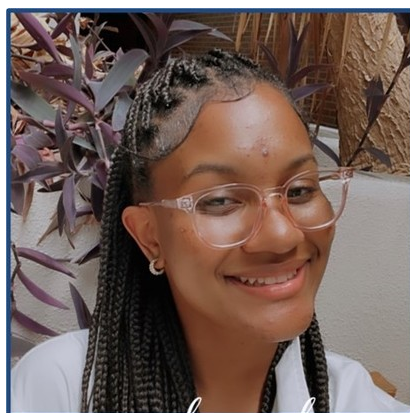

Aspironaut™ is excited to announce the expansion of summer programming opportunities for our interns this summer. The **Lab Skills Course** will include 20 hours of experiential learning with "hands-on" experiences and assessments of proficiency by laboratory mentors. Our goal is for interns to become familiar with the laboratory environment, review safety, and become familiar with basic techniques and equipment. **Science Communication** will bring national and international experts in science writing to campus for in-person workshops to guide the students in concise and compelling writing.

We continue our goal of finding talent to match with opportunity. And, we congratulate all our graduates who **aspire, seek, and achieve.**
