

Dispatches from the Digital Planet

August 2020

#DigitalPlanet

2020 is proving to be an eventful year around the globe—and on our digital planet. COVID-19 changed the nature of work, home life, and commerce. It brought to the fore pre-existing inequalities and inequities, underscored the need for more digitally connected communities, and prompted policymakers to turn pronouncements and promises into action.

We touch upon all these issues in this Dispatch - from a look into the Social Distance Readiness of 42 countries, to an exploration of the uneven state of the United States. We consider the leapfrog potential of 6 African countries and examine the paradox of India's digital progress.

We are also delighted to announce IDEA 2030: Imagining a Digital Economy for All, a new research initiative with support from the Mastercard Impact Fund, which brings together two increasingly important issues of our time: the need for inclusive growth and recovery, and the pervasiveness of digital technology.

Finally, we hope you will check out the newest addition to our website: “Off the Charts,” a new data visualization series showcasing our latest work.

COVID-19 is serving as an accelerating force for many trends; what do you think are the most overlooked realities of the emerging new normal? [Let us know on Twitter](#)

COVID-19 RAPID RESPONSE
RESEARCH

How prepared are these 42 countries for the Post-Pandemic, Socially Distant Digital Economy?

A study of digital preparedness and social distance readiness during the COVID-19 pandemic is one of the first research projects to come out of the three-year initiative “IDEA 2030: Imagining a Digital Economy for All.”

Funded by the Mastercard Impact Fund, in collaboration with the Mastercard Center for Inclusive Growth, this research evaluates data from 42 countries. Watch the 3-minute summary video.
