To mask or not to mask? What you need to know

As we ready ourselves for the fall semester, each of us has the opportunity to reset personal goals and aspirations. Mason Science is committed to supporting our students, faculty, and staff as we navigate the challenges of the upcoming academic year. Here’s something you may not have considered for your goals list, yet research shows it can be a powerful strategy:

Opt out early. If you already have a plan in place for your goals, consider revisiting it now. Think about ways to break down your goals into smaller, achievable steps. This can help you stay on track and make progress throughout the semester.

TrueRemove® technology could make mRNA vaccines such as the COVID-19 vaccines less costly, with fewer side-effects and more widespread use. Mason Science recently spoke to Patrick Gillevet, have devised improved lipid particles and TrueRemove® technology to help make mRNA vaccines easier to produce and distribute.

What you need to know

To mask or not to mask?

August 9, 2021. - August 13, 2021

Females of Color and those Underrepresented in STEM (FOCUS) Academy (virtual)

Transfers students are invited to join us for an interactive, virtual bridge session that builds on New Student Convocation. This session will cover the basics of how to transition to Mason.

IN THE NEWS

Efficient insulation rate for Sustainable Nanotechnology

Clayborne becomes Center for Sustainable Nanotechnology Affiliate. The center, as its name suggests, aims to promote the development of innovative materials that can help address global sustainability challenges. Mason’s contribution to this center aligns with our commitment to creating a sustainable future.
