THOUGHTS FROM THE DIRECTOR

Jim Jones

Organizations form advisory boards for many reasons, and CINA is no exception. The center actually has three boards which serve different but complementary purposes: a Board of Directors which advises on the overall operation of the center with a particular focus on DHS component needs and challenges, a Science Committee which advises on the current and emerging science and technology landscape as it applies to DHS needs and challenges, and a Transition Advisory Board which advises on transition paths and potential for the center research portfolio.

The Transition Advisory Board was formed this Fall and met in full on November 5, 2020. The board consists of professionals with expertise in transitioning technology to DHS, other government entities, and the commercial sector, as well as experts in technology commercialization. The board reviewed four center projects nearing transition-ready status, asked a lot of good and insightful questions, and provided suggestions on DHS components that could benefit from the research products, other government entities with potential interest, and possible industry and commercialization paths.

Our first Transition Advisory Board meeting provided a wealth of ideas, directions, and suggestions, exceeding even our high expectations. The access to expertise and decades of experience which all of our boards provide is fundamental to the center's success. We appreciate the time all of our board members dedicate to guiding the center's work, and we look forward to continuing to work with you all as we develop multidisciplinary approaches to address the disruption of criminal activities across the physical and cyber spaces.

RESEARCH

CINA Research Student Awarded Fellowship To Support Research in Disrupting Human Trafficking Networks

[Rensselaer Polytechnic Institute mathematics](#) student [Daniel Kosmas](#) has been awarded a National Institute of Justice Graduate Research Fellowship. The three-year award will support Kosmas' research in disrupting human trafficking networks.

Kosmas is exploring how to model and disrupt human trafficking with a goal of developing quantitative tools to assist criminal justice practitioners in policy making for combatting human trafficking. His work will expand upon network interdiction models to appropriately model the nuances of how trafficking networks operate, and develop new solution methods that account for these nuances.

CINA Welcomes 2020-21 Open RFP White Paper Submissions

CINA continues to welcome white paper submissions presenting research ideas intended to address questions and challenges that CINA, DHS, and/or its federal partners are currently facing, or are expected to be facing in the near future. This rolling RFP provides an opportunity for submissions to be accepted at any time during the RFP open period (June 2020 – June 2021). [Learn how to submit your proposal.](#)
