SHOULD WE RETHINK THE PEACOCK POLICING OF HUMAN TRAFFICKING NETWORKS?

CINA, the Criminal Investigations and Network Analysis center at George Mason University, has compiled a list of higher education IT influencers who are using social and digital media to inform, engage, and inspire their colleagues. These influencers are making significant contributions to the field of digital forensics and cybercrime, and don’t forget to grab our influencer images for your social media platforms.

CINA PI, David Maimon, has been awarded a National Institute of Justice Graduate Research Student Award in support of his research on disrupting human trafficking networks. Maimon is focused on using data science and machine learning techniques to identify patterns of human trafficking activity and develop strategies for disrupting these networks.

To Support Research in Disrupting Human Trafficking Networks

Tuesday, December 1

The Transition Advisory Board met for the first time on December 1, 2020. The board was convened to advise and make recommendations to the center on transitioning research projects. The board is comprised of experts in technology, business, and government who bring a wealth of experience and knowledge to the table. chair.

The Transition Advisory Board meeting was held remotely to maintain physical distancing and prevent the spread of COVID-19. The center was represented on the board by the Associate Director for External Affairs, who provided an overview of the center’s mission and goals.

Our first Transition Advisory Board meeting provided a wealth of ideas, directions, and possible industry and commercialization paths. The board reviewed four center projects nearing transition-ready status, which could benefit from the research products, other government entities with potential interest, and possible industry and commercialization. The board reviewed four center projects nearing transition-ready status, which could benefit from the research products, other government entities with potential interest, and possible industry and commercialization.

The Transition Advisory Board was formed this Fall and met in full on November 5, 2020. The board has three members: a Transition Advisory Board which advises on transition paths and potential for the center, a Science Committee which advises on the current and emerging science and technology landscape as it applies to DHS needs and challenges, and a Board of Organizations form advisory boards for many reasons, and CINA is no exception. The center actually has three boards which serve different but complementary purposes: a Board of Directors, an Advisory Board, and a Steering Committee.

Organizations form advisory boards for many reasons, and CINA is no exception. The center actually has three boards which serve different but complementary purposes: a Board of Directors, an Advisory Board, and a Steering Committee. The Board of Directors provides strategic direction and oversight for the center, the Advisory Board serves as a sounding board for the center’s leadership, and the Steering Committee is responsible for the center’s day-to-day operations.

All feedback has been evaluated and a proposal for the center’s 2021 budget will be included in the center’s annual report. The board will continue to meet quarterly to oversee the center’s transition process.

Event Brief: “Social Outlaws: What Network Data Tells Us About Gangs” with Martin Bouchard

The event was co-hosted by Simon Fraser University’s School of Criminology and the CINA Distinguished Speaker Series. It took place on October 15, 2020, and was a hybrid event attended in-person and via Zoom. The event was a great success, with a full house and engaging discussions.

Martin Bouchard, an Associate Professor of Criminal Justice at Simon Fraser University, delivered a keynote speech on the role of network data in understanding gang activity. He discussed how social network analysis can be used to identify key players and networks within gang organizations.

The event was co-hosted by Simon Fraser University’s School of Criminology and the CINA Distinguished Speaker Series. It took place on October 15, 2020, and was a hybrid event attended in-person and via Zoom. The event was a great success, with a full house and engaging discussions.
