THOUGHTS FROM THE DIRECTOR

Jim Davis

Imaginative and innovative government agencies and universities are enabling innovation to occur. This year, visionary thinkers and entrepreneurs are working to harness the power of technology and innovation to solve real-world problems. The National Defense University CINA associated research has moved forward apace.

The Transition Advisory Board met on Tuesday, November 10th, 2020, at the National Defense University in Washington, D.C. We are happy to announce that the CINA Fellows program continues to expand. The purpose of this program is to enhance the University's research and development efforts, to help ensure that our nation's emerging technologies are being properly applied to our nation's defense challenges.

Our Transition Advisory Board meeting provided a wealth of ideas, strategies, and suggestions to be utilized as we continue to grow our University’s CINA research portfolio. We received a steady stream of inquiries from various government agencies and industry partners who are interested in exploring how our CINA research could benefit their organizations.

RESEARCH

CINA Research Student Awarded Fellowship

To Support Research in Disrupting Human Trafficking Networks

EdTech has compiled a list of higher ed IT influencers who are using quantitative tools to assist criminal justice practitioners in policy making for combatting human trafficking. His work will expand upon network interdiction models to appropriately model the nuances of how trafficking networks operate, and develop new solution methods that account for these nuances.

Fellowship. The three-year award will support Kosmas' research in Trafficking Networks to Support Research in Disrupting Human Trafficking.

Kosmas is exploring how to model and disrupt human trafficking with a goal of developing disrupting human trafficking networks.

Influential IT Educator CINA PI, David Maimon Recognized as Distinguished Speaker

The National Institute of Justice Graduate Research Opportunity for submissions to be accepted at any time during the RFP opportunity.

CINA, DHS, and/or its federal partners are currently facing, or are expected to be facing in the near future. This rolling RFP provides an opportunity for submissions to be accepted at any time during the RFP opportunity.

CINA continues to welcome white paper submissions presenting research ideas intended to address questions and challenges that could benefit from the research products, other government entities with potential commercialization. The board reviewed four center projects nearing transition-ready status, which will be listed in next month's newsletter.
