Living in Indigenous Times

The Mason Science community will offer a fully virtual orientation program for prospective first-year students.

Orientation and fully prepares you for life as a Mason Science student.

August 6, 2021 | 10:30 a.m. to noon
Transfer Science Bridge 1 (virtual)
In trying to understand our deceptive universe, Astrophysicist Hakeem Oluseyi examines spacetime, the illusion of mass, the large-scale structure of the universe, dark matter, and dark energy.

In a partnership with Targeted Pharmaceuticals and Therapeutics, Inc., Tetra Bio-Pharma’s innovative drug ARDS-003 was found to boost antiviral drugs’ ability to decrease viral replication.

A study published in MDPI’s journal Environmental Science and Policy shows that wildlife is trafficked illegally across the globe every day and creates opportunity for emerging infectious disease (EID) events to occur. EIDs are highly contagious diseases that can be transmitted from animals to humans. The team includes Andrea Weeks, and ESP student Katherina Wilkins.
