The Strength of Science at Mason

Amelia Camp Profile

Mason wins a pot of 50 for the NIH "Translational Training Initiative Program for Undergraduate Researchers" (T3HE:U). This program will enable students to conduct research under the training of experienced mentors, with the goal of preparing them for careers in biomedical and behavioral research.

The NSF has awarded Mason with a $50,000 grant to develop a new program that trains undergraduate students in the fields of Materials Research and Engineering.

RESEARCH & DISCOVERY

In the News

Americans" reports its updated COVID-19 winter regulations

Cindy Smith, whose scientific curiosity has taken her all the way to the top of international research and technology centers, will be speaking at Mason's upcoming conference on climate change and its effects on the environment.

Happening at Mason
