**Contents of this Month's Update**

- **Lock-in and Exit**
  - Extremism development to share their knowledge, experience, and expertise with the audience. A subset of the group will meet after the event to develop white papers that outline key questions, challenges, and possible ways forward. Vigilance to detect and thwart extremism and increasingly complex threats to homeland security. Increasingly observing the growth of a cyberphysical nexus of extremism. Within this dynamic, Cyberspace content and interactions have emerged as a breeding ground for the spread, or even birth of extremism and violence. From what can be done to prevent or mitigate such attacks, and how to detect them earlier. Questions discussed include the impact of the attack, sometimes described as a software supply chain attack. This seminar's discussion focused on the attack's impact and research aimed at preventing and mitigating similar cyber-attacks. Questions discussed include the impact of the attack, sometimes described as a software supply chain attack. The SolarWinds cyberattack, affecting U.S. government and private sector systems across the United States, was featured in a showcase panel.
  - Combat Illicit Trade on Wednesday, April 14 from 12:00 p.m. – 1:30 p.m. EST to listen to him discuss the fight on illicit trade.
- **Watch the Event**
  - Learn how to submit a proposal for completion of a specific industry need and usually covers 4-6 weeks. The paid, professional, short-term internship is structured to allow students a shorter experiential learning option. CINA continues to focus on enhancing workforce development and is investigating a micro-internship model which could offer students academic institutions and DHS industry partners.
  - MSDuring March 26, looking at cyber extremism and violence in our highly connected world.
- **Discover**
  - In this event we bring together leading academic experts to discuss this catalyst of extremism and increasingly complex threats to homeland security. Increasingly observing the growth of a cyberphysical nexus of extremism. Within this dynamic, Cyberspace content and interactions have emerged as a breeding ground for the spread, or even birth of extremism and violence. From what can be done to prevent or mitigate such attacks, and how to detect them earlier. Questions discussed include the impact of the attack, sometimes described as a software supply chain attack. This seminar's discussion focused on the attack's impact and research aimed at preventing and mitigating similar cyber-attacks. Questions discussed include the impact of the attack, sometimes described as a software supply chain attack. The SolarWinds cyberattack, affecting U.S. government and private sector systems across the United States, was featured in a showcase panel.
- **Watch the Recent CINA Distinguished Speaker Series with Deanna Austin**
  - Watch CINA's Director, Deanna Austin, as she discusses the impact of COVID-19 on the economy, state, and local stakeholders, as well as industry partners.
