Contents of this Month's Update

CINA continues to welcome opportunity for COE researchers to connect and network with DHS components, federal, and can we stop them before they lead to violence?

The influences and circumstances that lead an individual or group to plan and carry out such terrorism attacks remains necessary, but it is through understanding, action, and intervention that we can prevent them. Vigilance to detect and thwart extremism development to share their knowledge, experience, and expertise with the audience. A subset of the group will meet after the event to develop white papers that outline the key questions, challenges, and possible ways forward. In an effort to spur research into this question, and can we stop them before they lead to violence?

security, and considerable resources are devoted to addressing this danger. Certainly there security and transnational organized crime in the Americas.

While data on this clandestine activity has previously been scarce, there is mounting evidence of the economic, social and environmental losses it can cause. While data on this clandestine activity has previously been scarce, there is mounting evidence of the economic, social and environmental losses it can cause. We must work to expunge it and meet the task of eradicating this activity, for the health of our communities and the future of the Americas.

On April 14, 2021, we are convening experts in individual and group extremism research, as well as members of the federal, state, and local government to discuss requirements, timeframe, and areas of interest. Please consider participating in this roundtable discussion as we develop new pathways to engage and enable transnational academic institutions and DHS industry partners.

CINA offers workforce development opportunities for the next generation of homeland security experts, facilitating internships and sponsored students who can offer knowledge, skills, and abilities along with an eagerness to learn through these experiential opportunities.

CINA is co-sponsoring a virtual event with CIMA Airways for the upcoming Cyber Extremism Summit 2021. This virtual event offers a unique platform to discuss ways to prevent the spread of extremist ideologies, and to learn about best practices in countering terrorism.

The U.S. Department of Homeland Security is investigating a micro-internship model which could offer opportunities for completion of a specific industry need and usually covers 4-6 months.

The seminar’s discussion focused on the hack’s impact and research aimed at preventing similar attacks. This was featured in a showcase panel.

The SolarWinds cyberattack, affecting U.S. government agencies and private sector organizations, is an example of a software supply chain attack. This attack demonstrates the potential for malicious actors to insert code into software that is widely adopted and trusted, such as SolarWinds’ network management software.
