Contents of this Month's Update

The RFP open period (June 2020 – June 2021). This rolling RFP provides CINA continues to welcome audience. A subset of the group will meet after the event to develop white papers that outline extremism development to share their knowledge, experience, and expertise with the Thursday, March 25, looking at cyber extremism and violence in our highly connected world. In an effort to spur research into this question, and can we stop them before they lead to violence? Terrorist acts...but how do these extremist views develop and gain traction in the first place. A common thread among domestic and international terrorists is are efforts to detect and prevent specific acts, but other work seeks a deeper understanding of Terrorism, whether international or domestic in origin, remains a top threat to our national Vigilance to detect and thwart what can be done to prevent or mitigate such attacks, and how to detect them earlier. and mitigating similar cyber-attacks. Questions discussed include the impact of the attack, sometimes described as a software supply chain attack. hackers are believed to have exploited weaknesses in SolarWinds' system-to-system (supply chain) updates that commonly exist between many internet-connected ecosystems. This is government agencies and technology companies, is was featured in a showcase panel.
