Oracle BI Office Hours Demo on June 30
Carryforward Balance FinUnit and Project: Account 300000
As we approach the new fiscal year, we want to update you on the data movement that will support our fiscal year close-out activities. Oracle only reflects the net position at the entity/fund level, UC San Diego's balancing segments. We recognize that there is a need to see this information at the Financial Unit and Project level.

The central Oracle BI team is currently rewriting the impacted reports to use ending net position from the previous fiscal year instead of Account 300000 for all managerial P&L based reporting.

For a demonstration and further Q&A, please attend the Oracle BI Office Hours hosted on Wednesday, June 30 @ 1:00pm.

**Tips & Tricks**

**General**

**How to Invite Supplier Contacts to Payment Compass**

Payment Compass is a tool used to manage the payments and registrations for non-employee payees at UC San Diego. You can invite a contact to view their existing payee/supplier profile per the instructions in our new [KBA](#). There are
several other KBAs available about how to use the system as well, so take the time to check them out by searching Payment Compass in the Services & Support Budget & Finance Knowledge Base.

**Concur Travel & Expense**

**Business Meetings and Entertainment**

Information regarding COVID-19 Event Planning and Attendance can be found on the Return to Learn website. Be sure to follow these campus event guidelines in addition to UC Entertainment Policy requirements when handling an in-person event and submitting the Event Expense Report.

**Adding Sufficient Allocation Data**

When creating an allocation with your chart string, verify that you have added all of the COA (Fund, Financial Unit, Approver, Function) and/or POET (Project, Task, Expenditure Type) values required for the Concur document. If your Project is a Sponsored Project (begins with SP), please be sure to enter a Funding Source as well. Doing so will allow your Requests and Expense Reports to successfully pass validation.
