A new report on the Department Exceptions Panorama identifies UCPath, Concur, or Kahala errors in Oracle transactions that were recorded without a project in the General Ledger. This report can be used to identify invoices that have failed to post in Oracle and require corrective action.

**Transactions on No Project:**
- Identifies transactions associated with contracts that will not post correctly.
- Allows users to identify and correct any issues with transactions that do not have a project segment.
- Provides a consolidated view of all transactions that require correction.

**Non-Sponsored Generate Invoice Process Errors:**
- Identifies invoice hold errors that may require manual intervention.
- Helps users to determine the root cause of errors and take corrective action.
- Aids in the identification of transactions that require further review and analysis.

**Non-Sponsored Contract Lines Without Project or Task:**
- Identifies contract lines that do not have a project or task associated with them.
- Helps users to ensure that all contract lines are appropriately accounted for.
- Assists in the identification of any missing or duplicate contract lines.

**Account or Fund:**
- Identifies issues related to accounts or funds associated with transactions.
- Helps users to ensure that all transactions are recorded in the correct accounts or funds.
- Assists in the identification of any missing or duplicate accounts or funds.

**Non-Sponsored Contract without Contract Number:**
- Identifies contract lines that do not have a contract number associated with them.
- Helps users to ensure that all contract lines are appropriately accounted for.
- Assists in the identification of any missing or duplicate contract lines.

**Oracle Workflow Notification Updates Coming 08/29/2022:**
