BI & Financial Reporting

New Report Releases in the Department Exceptions Panorama

- **Non-Sponsored Contract Lines Without Project or Task and Non-Sponsored Contracts Without Revenue Account or Fund:** Individuals who are responsible for creating or managing non-sponsored contracts should use these two reports to identify setup errors on their contracts. If contracts are missing any of these chartstring elements, transactions associated with the contract will not post correctly.
- **Non-Sponsored Generate Invoice Process Errors:** Errors can sometimes occur in Oracle that prevent invoices from posting correctly. Use this report to identify invoices that have failed to post in Oracle and require corrective action.
- **Transactions on No Project:** A new report on the Department Exceptions Panorama identifies UCPATH, Concur, or Oracle transactions that were recorded without a project in the General Ledger. This report can be used to identify transactions that belong on a project so they can be corrected.
