Announcements

Oracle Cloud Scheduled Maintenance on September 16

Oracle production environment will be down for maintenance from **Friday, September 16, 2022 @ 7:00pm** through **Sunday, September 18, 2022 @ 7:00pm**.

Oracle Update Coming Soon

An Oracle enhancement that will streamline the requisition approval process is slated to launch later this month. The new process will auto-generate a PO before routing it to the appropriate professional buyer for review. This minor change to the approval workflow will allow buyers to access and review more than one request at a time, allowing them to work through requisitions more quickly. Once the enhancement launches, departments should take note that the generation of PO number will not necessarily mean it has been sent to the supplier. Closer to the launch date, screenshots will be provided to guide campus through this process.

BI & Financial Reporting

New Blink Page: [Project Classifications](#)

Based on suggestions from the Fund Management Office Hours, we have created a new table that lists Project Class Categories and Class Codes, which are now being used to determine whether PPM costs are reported as year-to-date (YTD) or inception-to-date (ITD). All projects should have an accurate Project Class Category and Code assigned, as these fields will be used more often to search for and display project information in dashboards and reports. Project Class Categories & Codes can be changed in the [Project & Award Data Update Application \(PADUA\)](#). Before September 27, we encourage you to take some time to review both Project Class Categories and Codes for each of your projects.
